
Meeting called by

Unknown name client
Indian it consultant

Discussion regarding :

Reviewing the code/optimization and questions regarding the problem
API for the campaign summary
Side project

Attendees: 2 people

AGENDA TOPICS:

Started with the discussion on reviewing of database connections code

Client wants the consultant to review the code for database and come up with questions to code & come up with the questions

Is it desirable to optimize the code to make it more generic or in other words so that it can be utilised for other palm schema.

Name of the database connection ie new palm test

Some more technical details were discussed about it since client is planning to use that for data base code for new palm schema

He does needed to introduce it new schemas

The consultant wanted to know the priority of work between the campaign summary side project and database connection was dummy structure for campaign summary ,palm test review and then side project .

Consultant asked if he wanted us to rewrite the interactions for database . but he was told to extract the data and put it in format and lets the tables interrogates what targets are .

They will discuss the rest of tak on monday and tuesday .

He wants to consultant to review the code and use the same syntax except for variables are structured in different texting environment oracle and prod back up

Getting in more detail he wanted to give more of key to cass relationship one to one ie campaign id to campaign ck .

Desired to get a version that is faster and uniform for various application

Do the pytest change the code take it and create a new file and do not maske changed in database .

For oracle for some error query with inbound error that was explained with different variable being passed.
